

**LIT LEAGUE**  
**Leaf Symmetry**

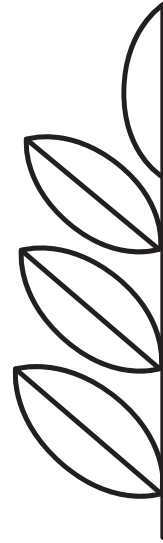

Did you know that most leaves are naturally symmetrical? That means that if you fold them in half, they will be exactly the same on both sides. Symmetry is an important concept to master because it is found in nature, art, and math. Practice drawing in the second half of each leaf on our Leaf Symmetry sheet.

**Poplar**

**Birch**

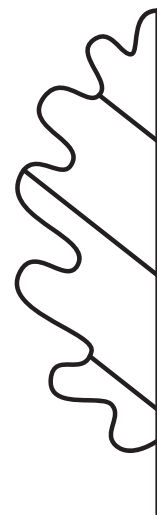

**Ash**

**Elm**

**Sea Buckthorn**

**Oak**

**LIT LEAGUE**  
**Face Symmetry**

Not all faces are symmetrical, but completing a face is a great way to practice your symmetry and drawing skills. Draw in the second half of the fox face below.
